PWP Operations

PWPs can generate EPR Certificates post approval of physical verification by the concerned SPCB/PCC. To generate the certificate the PWP shall provide requisite details in – Procurement, Production and Sales. Bulk upload provisions for uploading the procurement and production details is available on the corresponding sections of all types of PWPs. Now the bulk upload feature has been incorporated for **cement coprocessing units** to upload individual monthly sales transactions for generating EPR certificate.

Bulk Upload Feature

The cement co-processing units can use the CPCB-BOT to upload the individual sales transactions. CPCB-BOT is a Robotic process automation (RPA) technology that can be used to upload only sales details under PWP operations.

Robotic process automation (RPA) technology makes it easy to build, deploy, and manage software robots that emulate human actions interacting with digital systems and software.

Just like people, software robots can do things like understand what's on a screen, complete the right keystrokes, navigate systems, identify, and extract data, and perform a wide range of defined actions.

The CPCB-BOT can upload the transactions for sales under PWP operations. The steps for using the BOT are explained later in this document.

Steps to download the CPCB-BOT

Step 1: Go to the website <https://eprplastic.cpcb.gov.in/>

Step 2: Go to the tab **Bulk Upload – PWP-cement**

Step 3: Click here [CPCB-BOT \(v1\)](#) to **download CPCB-BOT(v1)**

BOT folder can be saved in any drive on your computer.

3. Folder Structure of the CPCB-BOT

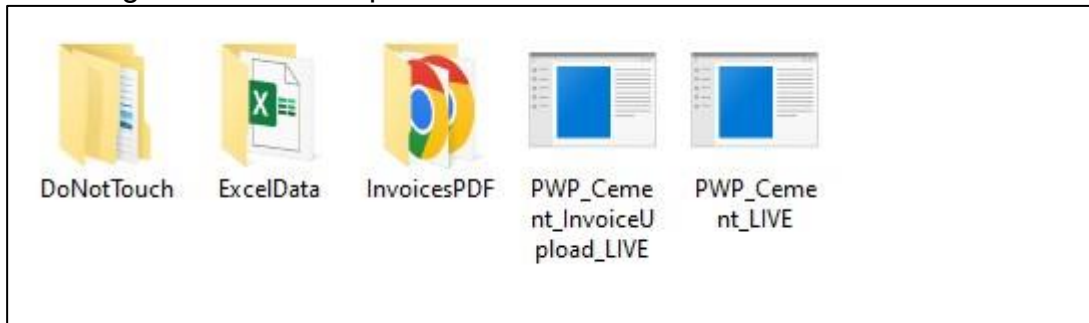

a. Main Folder

- Folder “PWP Cement” is for uploading sales data

b. Sales Details

Following sub folders are present in 'PWP Folder'

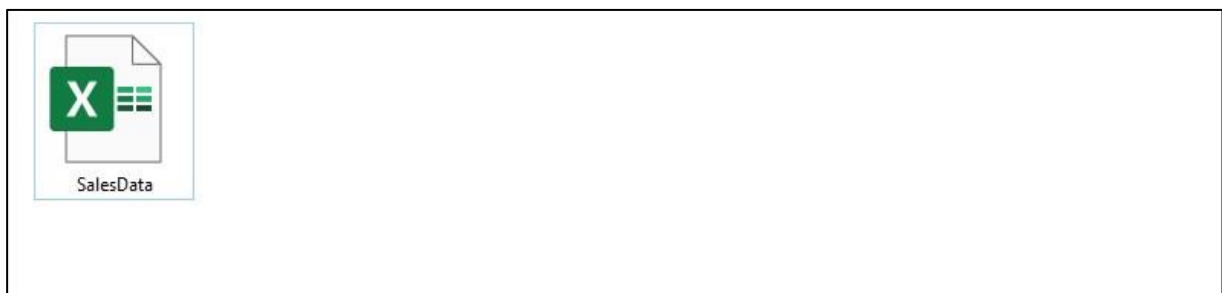

- **Do not touch:** Please do not touch this folder
- **Excel data:** Total Production and Sales data to be saved in this folder.
- **Invoice PDF:** Invoice of individual transaction to be saved in this folder. It is to be noted that a specific name is to be assigned to each pdf file and the same name shall be provided in the excel data against the corresponding sales details.
- **PWP_cement_Live.exe:** The BOT can be initiated after the incorporation of production and Sales details.

Please CLOSE the Excel data sheet before you start the BOT.

- **PWP_Cement_InvoiceUpload_LIVE.exe:** This BOT is used to upload the invoices.

c. Excel Data (Sales Details)

- **SalesData.xlsx:** The excel file comprise of following two sheets:

(a) Production inventory sheet: First production inventory data to be saved in the Production Inventory sheet having same sl. No. as mentioned in

‘Inventory & Sales’ section on the portal.

The Column “is Entry Done” has to be left blank while filling the production data

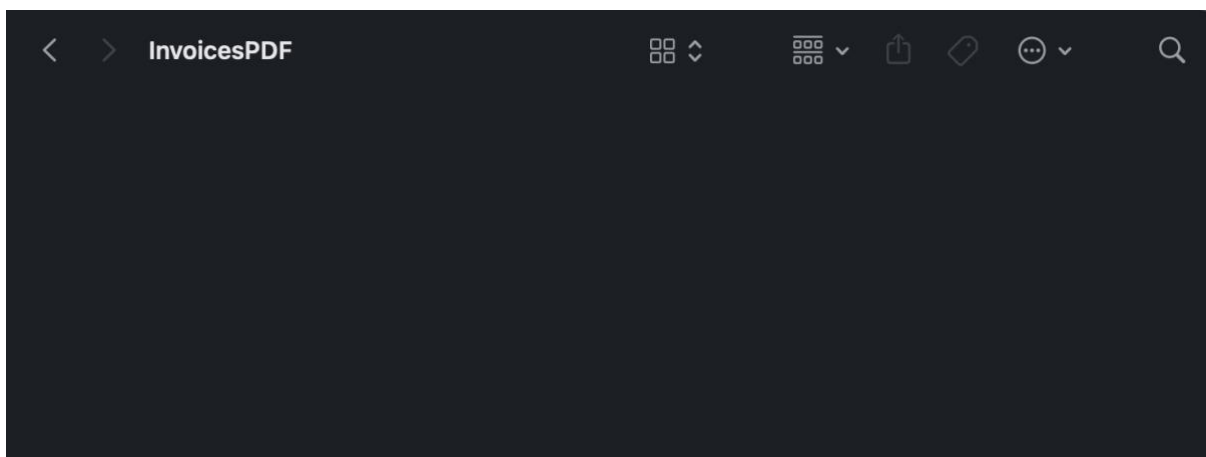

(b) Sale sheet: Sales data to be saved in this sheet.

Points to be noted:

1. For each Serial No. of the column Quantity Sold (MT) in Sheet ' Production Inventory', breakup of respective sales (Amount of material sold) is to be denoted via same Serial No. in sheet ' sales'
2. Sum of respective sales entries in sheet 'sale ' should be equal to the respective quantity sold column sheet ' Production Inventory'

Note: Three Columns “Generated Invoice No” “is Entry Done” and “is Invoice done” have to be left blank while filling the sales data. ‘EPR Invoice No.’ and ‘is Entry Done’ shall be generated and auto filled in the Excel data when sales.exe is run. Invoice Upload (Yes/No) shall be auto filled when InvoiceUpload.exe is run

d. InvoicesPDF (Sales Details)

Steps to use the CPCB-BOT for Sales Transactions

Step 1: Extract the **CPCB-BOT(v1).zip** file to any location.

Step 2: Go to the **Sales Details** Folder.

Step 3: Go to the **Excel Data** Folder.

Step 4: Open and fill up the **SalesData.xlsx** file and close the file.

Step 5: Copy and paste all the invoice pdf copies inside the **InvoicesPDF** folder having same file name mentioned in sales sheet.

Step 6: Double-click and run the **PWP_cement_live.exe** file.

Step 7: Enter the EPR Portal and fill the Login credentials details and OTP and wait.

Step 8: Wait for the CPCB-BOT to upload all the transactions.

Step 9: After the transactions have been uploaded, double-click and run the **PWP_Cement_InvoiceUpload_LIVE.exe** file.

Step 10: Enter the EPR Portal Login credentials and OTP and wait.

Step 11: Wait for the CPCB-BOT to upload all the pdf invoice files.

Steps to fill up the Production Inventory sheet

The following details are required to be filled up to upload the production details. Kindly copy the entire production inventory table from the portal and paste the same into the production inventory sheet.

Column name	Description
Sr. No.	Serial number (same sl. No. as mentioned in 'Inventory & Sales' section on the portal)
Production Date	Mention the date similar as mentioned in 'Inventory & Sales' section on the portal
Qualifying Feed(MT)	Mention the quantity similar as mentioned in 'Inventory & Sales' section on the portal

Qty of PW processed for Cat I (MT)	Mention the quantity similar as mentioned in 'Inventory & Sales' section on the portal against the each sl. no.
Qty of PW processed for Cat II (MT)	
Qty of PW processed for Cat III (MT)	
Qty of PW processed for Cat IV (MT)	
Available Quantity (MT)	Mention the total production quantity as mentioned in 'Inventory & Sales' section on the portal
Quantity Sold (MT)	Mention Total quantity sold of that particular inventory

Steps to fill up the sales sheet

The following details are required to be filled up to upload the sales details:

Column name	Description
Sr. No.	Serial number (similar as Production Inventory sheet)
Name of the Entity	As per the invoice
Product Type	Cement/Clicker
Amount of material sold (MT)	As per the invoice
Percentage of clinker	For clicker it is 100%. For Cement, % of clinker used to produced that quantity of cement.
Address	As per the invoice

State	As per the invoice
District	As per the invoice
GST No of Seller	Input the GST number of the seller
Bank Account No	Input the Bank account number
GST Amount	Input the GST amount for the transaction
Principal Amount	Input the selling amount
Sales Date	Input the date of sale as ddmmyyyy format
Is Entry Done	To be left as blank
Generated Invoice No	To be left as blank
File Name	File name of the invoice
Is Entry Done	To be left as blank

Important points for the CPCB-BOT

- The first row of the **SalesData.xlsx** file should not be updated or modified.
- Do not change the sequence of columns.
- Close the **SalesData.xlsx** file prior to running the bot.
- Dropdowns are provided in the excel. Thus, the same must be used to fill the data in **SalesData.xlsx** file.
- All uploaded entries must be deleted after transactions are uploaded on the EPR portal from **SalesData.xlsx** before a new set is added.

Device specifications

- Host Operating System Requirement – Windows OS 10+ with processor @ 1.30GHz 1.50 GHz
- System Type – o Minimum Preferred - 64-bit operating system, x64-based processor o Installed RAM – Minimum 8 GB

o Processor - Intel(R) Core(TM) i7-1065G7 CPU @ 1.30GHz 1.50 GHz
